Sketchfab for teams

- Permission management: who can upload, download, edit, view
- Asset search by filters like polygon count, file format, uploader
- Scene setup: scale, lighting, floor level...
- Collaboration tools: commenting, 3D annotations
- Conversion tools

“A sort of Google Drive specifically tailored for 3D”

App-free AR support

Models published on Sketchfab are **viewable in AR** straight from the player, on iOS and Android. Give it a try by scanning this QR code or go to skfb.ly/6RoA9

Our AR editor lets you easily setup your scale and position.

WebXR support

Nice to see @Sketchfab running smoothly in #WebXR on #Quest2 🤖. From google translate: "with 2, it became smooth like a native application."

こっちのカオナシのsketchfabは、初代でも録画しながらそこそこ見れたけど、2だとネイティブアプリばりにスムーズになった。
WebGLにも優しい #Quest2 🤖
